

DUNSTANS

**THINKING
OUTSIDE
THE HOLE**

Established in 1950, Dunstans Construction Group has developed a proven record of delivering turnkey infrastructure projects for our clients

Dunstans is a leading company providing design, engineering, construction and maintenance services to the resources, energy and infrastructure sectors. We aim to build, maintain and support customer operations through safe, reliable, innovative and cost effective services.

Dunstans aims to be recognised as a truly great company to work for, work with and partner with.

Our highly regarded reputation is derived from our people and our culture.

COMPANY FACTS

- Established in 1950
- Directors: Ian & Murray Dunstan
- Team of 100+ employees
- 200+ major plant items
- Headquarters: Wangaratta, Victoria
- International projects

Dunstans Executive Team (left to right):
Bryce Morrow, Ian Dunstan, Murray Dunstan, Rohan Cassidy

AN INTREPID HISTORY

DUNSTANS IS a third generation, family-owned construction company based in Wangaratta, Victoria since 1950.

In the years immediately following World War II, Australia's population swelled by 70,000 immigrants a year, placing greater pressure on services and housing.

One year later the father and son team purchased their 'pride and joy' – a Caterpillar D6 8U bulldozer used for logging and earthmoving.

With a pioneering spirit and an opportunity to help build a new Australia, George Dunstan went into business with his son Ray. They bought their first piece of plant, a 1945 Ford truck, and set out to facilitate the booming timber industry by transporting and milling red gum. Five years later, in 1955, the Dunstans built their own red gum sawmill and began to supply major infrastructure projects throughout Victoria.

In 1990, Ray's sons Ian and Murray took on their current roles as Directors. At age 83, Ray Dunstan still shares an active interest in the business he helped to create. Throughout the company's changes, growth and expansion, today Dunstans remains true to the family values and intrepid spirit of its foundation.

DUNSTANS CONSTRUCTION GROUP

MISSION: Rather than aim to be the cheapest in the market, we deliver a quality service that's excellent value, and achieves your optimal outcomes efficiently and cost-effectively.

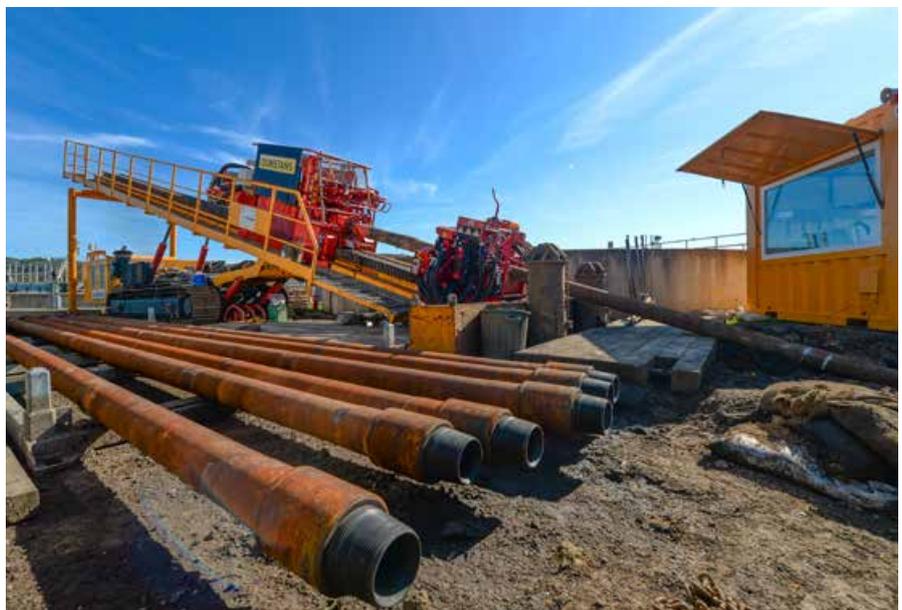

APPROACH: We've built our business on consistently striving to create and maintain win/win relationships with our clients and strategic partners.

Family Values at our core

- ◆ Support our team to balance enjoyment, fulfillment and professional development
- ◆ Invest in the highest quality machinery and expertly maintain it
- ◆ Innovate to find the best solution for each project
- ◆ Go 'above and beyond' to achieve successful outcomes at all times
- ◆ Cultivate a 'can do' attitude

Professional Standards without compromise

- ◆ A finished quality product must be achieved on all levels
- ◆ All team members understand the importance of rigorous Health and Safety and Environmental standards
- ◆ Value for money is vital to maintaining our robust industry reputation and ensuring repeat business

INTEGRATED HSEQ MANAGEMENT SYSTEM

DRAWING ON DECADES OF EXPERIENCE, Dunstans has developed an integrated and certified Management System to meet the highest standards for Quality, Health & Safety and the Environment.

Quality

We're dedicated to providing every Client with a quality product and professional service. To make this happen we bring together a thorough design and planning process, state of the art machinery and an experienced team.

We work closely with our Clients throughout the project to meet their expectations and needs – continually striving to improve our performance and systems as a leader in our field.

Health & Safety

We simply won't compromise when it comes to safety. Our goal is an injury free workplace; on site, on the road and in the office, and we take all necessary steps to meet this goal.

At a project level, we understand all risks associated with our work and ensure they are minimised and controlled.

We're committed to providing a consistently safe environment for our team and have implemented the systems and processes to do so. We also work with our team so that everyone is on the same page and shows a real commitment to safety.

Environment

We all understand how important it is to protect the environment in which we work and conserve it for future generations. This principle guides our project design, plans and management and we're always looking for ways to reduce our impact on the environment and local communities.

We're transparent in adhering to our own rigorous environmental standards as well as complying with all other applicable legislation and obligations. As a company we're committed to reducing our overall environmental impact and becoming a sector leader in sustainability.

CUTTING EDGE EXPERIENCE

DUNSTANS IS THE Australian leader in Trenchless services – in particular Horizontal Directional Drilling (HDD), and we are determined to stay on top. Our 100% success rate is supported by an unrivalled fleet of modern HDD rigs with up to 400 tonnes of drilling thrust/pulling power.

We have successfully completed HDD crossings in all Australian states. Our highly respected HDD team includes some of the most knowledgeable, talented and experienced leaders in the industry. We work together to set industry records, to develop new methods and to design and fabricate equipment to expand the possibilities for using HDD in increasingly challenging situations.

Dunstans can meet all Trenchless project requirements from a minor utility crossing to large river, landscape and outfall pipeline installations. Our services are not limited to HDD, we offer all trenchless solutions ensuring the right application is used for the project.

Extensive experience in:

- ◆ **Horizontal Directional Drilling**
- ◆ **Direct Pipe**
- ◆ **Horizontal Dewatering**
- ◆ **Micro Tunneling**
- ◆ **Auger Boring**

TECHNICAL CAPABILITY

EVERY SUCCESSFUL PROJECT starts by fully understanding the project objectives and the site conditions at its location. These factors will drive the engineering design and determine the most appropriate methodology necessary to successfully plan and execute turnkey projects.

Initial studies

We bring confidence to clients and partners from the outset of a project, by diligently gathering the essential information.

- Feasibility studies
- Route selection
- Budget pricing
- Geological evaluations.

Crossing design

Our methodical process ensures that all options are considered to achieve optimal outcomes for the project.

- Front End Engineering Design (FEED)
- Detailed Design
- Pulling calculations
- Hydraulic fracture analysis and modelling.
- Tooling and equipment design.

Project planning

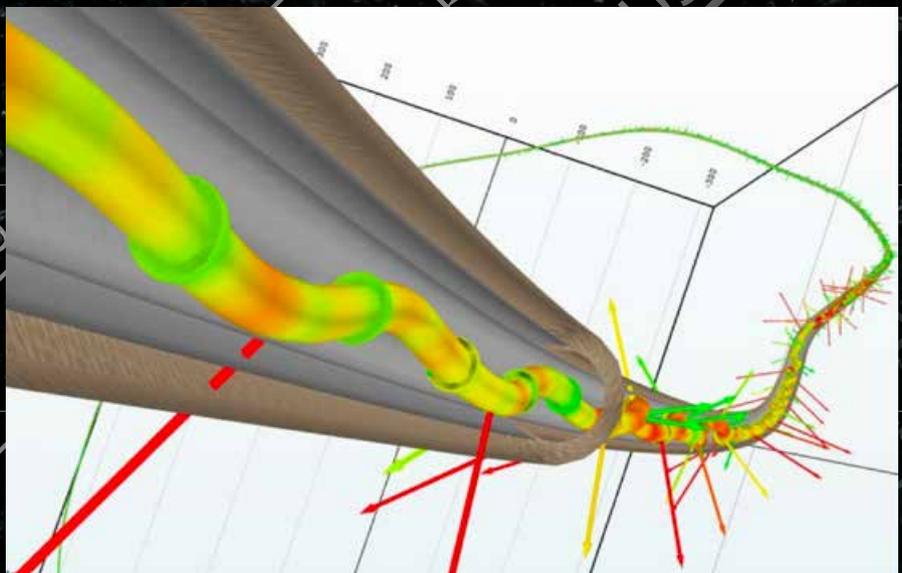

We work in collaboration with project stakeholders to mitigate costs and effectively schedule to meet deadlines.

- Constructability Reviews
- Risk/HAZID assessments and management.
- Development of contract documentation and drawings.

Capacity

Our highly experienced in-house team is backed by a fleet of HDD and support equipment that's unrivalled in Australia.

- Designers
- Engineers
- Drilling experts
- Project teams
- Extensive equipment fleet

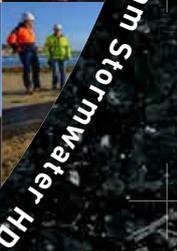

SOME CASE STUDIES

FOR THREE GENERATIONS, Dunstans has been delivering ground breaking projects.

Our track record of delivering successful projects in complex or challenging situations speaks volumes about our experience. If you'd like more detail on any of the projects listed here, please ask.

fall Project | LCRP Bentleigh Dewatering | Angelsea WRP Outfall | Horizontal Extraction Well | Mitcham Stormwater HDD outfall | Isaac River Crossing

CHAMPIONING INNOVATION

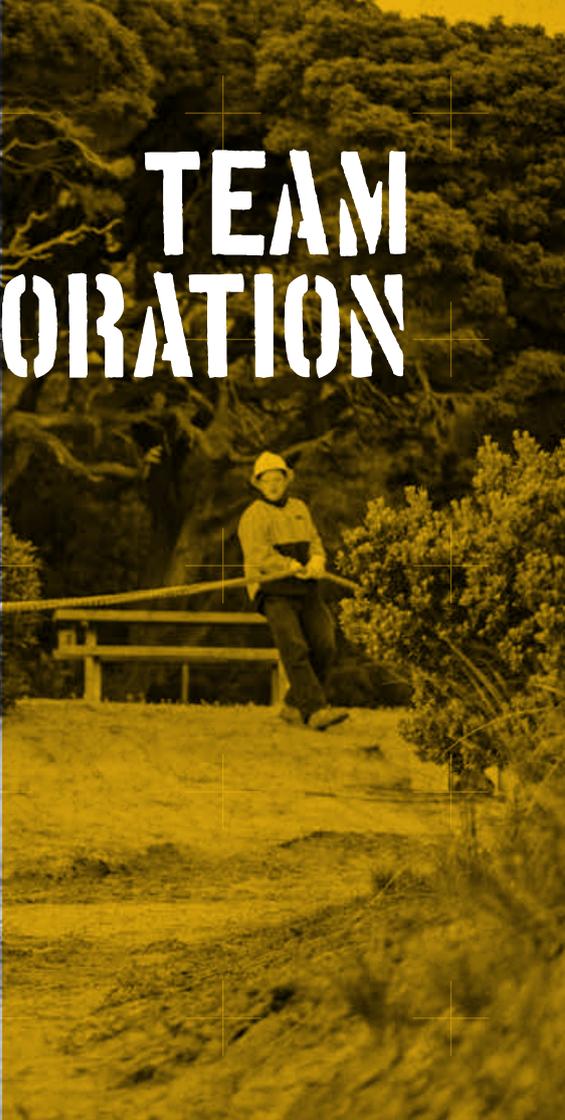

WE'RE CONSTANTLY MOVING FORWARD, offering custom-made equipment, advanced software systems and collaboration tools – keeping us at the forefront of our sector.

It's these constant improvements and leaps in our ability to solve problems that bring success to our clients. Meeting each complex challenge with a practical solution has enabled us to build lasting, ongoing client relationships.

Driven by consistently 'Thinking Outside The Hole', we've developed ground-breaking new processes and methodologies that follow and in some cases lead, industry best practice.

TEAM COLLABORATION

WORKING TOGETHER creates better outcomes. Through our close collaboration with clients, other industry specialists and among our own teams, we reach better solutions faster.

Despite decades of strong growth, at its heart, Dunstans is very much a family business. As one team driven by the same collective goals, this collaborative, supportive approach means everyone is part of the same successful journey.

We believe this approach is our point of difference within the industry, and clients have told us that this is the key to our maintaining such great long-term relationships.

WORKING TOGETHER

HAVING SUPPORT FROM the wider Dunstans group allows the trenchless division to drive efficiencies through:

- Integrated services
- Professional employees
- Dunstans diverse fleet
- Service and Maintenance
